ABOUT ME

Graduating from KYH in May 2024 with a focus on Front End Development, I bring a diverse background from healthcare and entrepreneurship. Skilled in HTML, CSS, JavaScript, React, UX/UI design and backend knowledge.

I have gained practical experience through my recent internship at Seemli. In this role, I developed a CMS, handling job advertisements and applications, as well as a career page. I created the UX design, did both front- and back-end development in this project. I'm dedicated to bring projects to life and expand my skill set. I aspire to become a full-stack developer in the future.

With a sociable customer orientated and empathetic nature, I thrive in collaborative environments, bringing positive outcomes for clients. Currently seeking a full-time Front-end developer position in Stockholm to contribute to a dynamic team and further my professional growth.

Outside of work, I enjoy fitness, gaming, and spending time with family.
